E-Discovery Challenges In Healthcare

Objectives

- To Identify and Discuss:
 - E-Discovery? What is it?
 - Are Healthcare Entities Ready?
 - Unique Challenges to Healthcare

E-Discovery – What is it?

➤ Lots of Definitions...

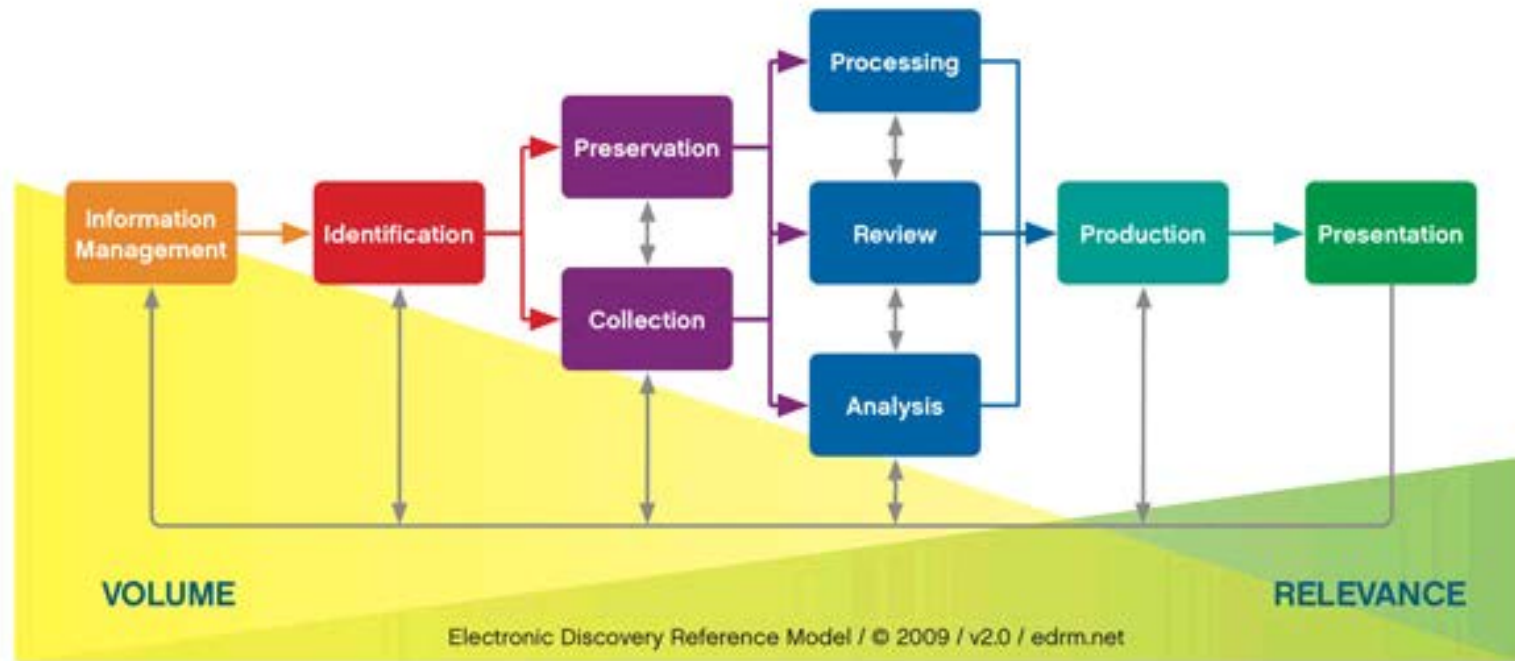

- Electronic discovery refers to any process in which electronic data is sought, located, secured, and searched with the intent of using it as evidence in a civil or criminal legal case.

➤ Does this definition fit the healthcare arena?

➤ The Rule changes occurred in early 2009, why has it taken so long for e-Discovery to invade the healthcare arena?

EDRM – the Basics

Electronic Discovery Reference Model

Are Healthcare Entities Ready?

- Metro Phoenix Area?
- Arizona?
- Hospital Systems?
- Physician Practices?
- Biomedical Manufacturers?

Unique Challenges to Healthcare

- Project Management
- Resource Limitations
- Information Management
- Biomedical Equipment
